

AMANDO DENTAL

PANORAMIC X-RAY

As part of your new patient evaluation today, a visual exam will be performed for oral cancers. It will be explained to me that normal x-rays do not capture the jawbones, zygomatic bones, styloid process, and maxillary sinuses. In addition, I will be informed by the staff of Amando Dental that the dentist cannot ensure cancers (malignant or benign), cysts, or other abnormal formations do or do not exist, unless a panoramic x-ray is taken.

*Per my dental insurance carrier, the cost of a panoramic film is \$_____.
I understand that this fee will be charged to me today should I wish to have a panoramic film taken.*
